

Arinst Reset menu.

At the moment of writing (06.09.2022) this guide is applicable to following Arinst devices:

- Arinst VNA-PR1
- Arinst VNA-PR1-M
- Arinst SDR Dreamkit V1D
- Arinst SDR Dreamkit V2D
- Arinst SSA R3

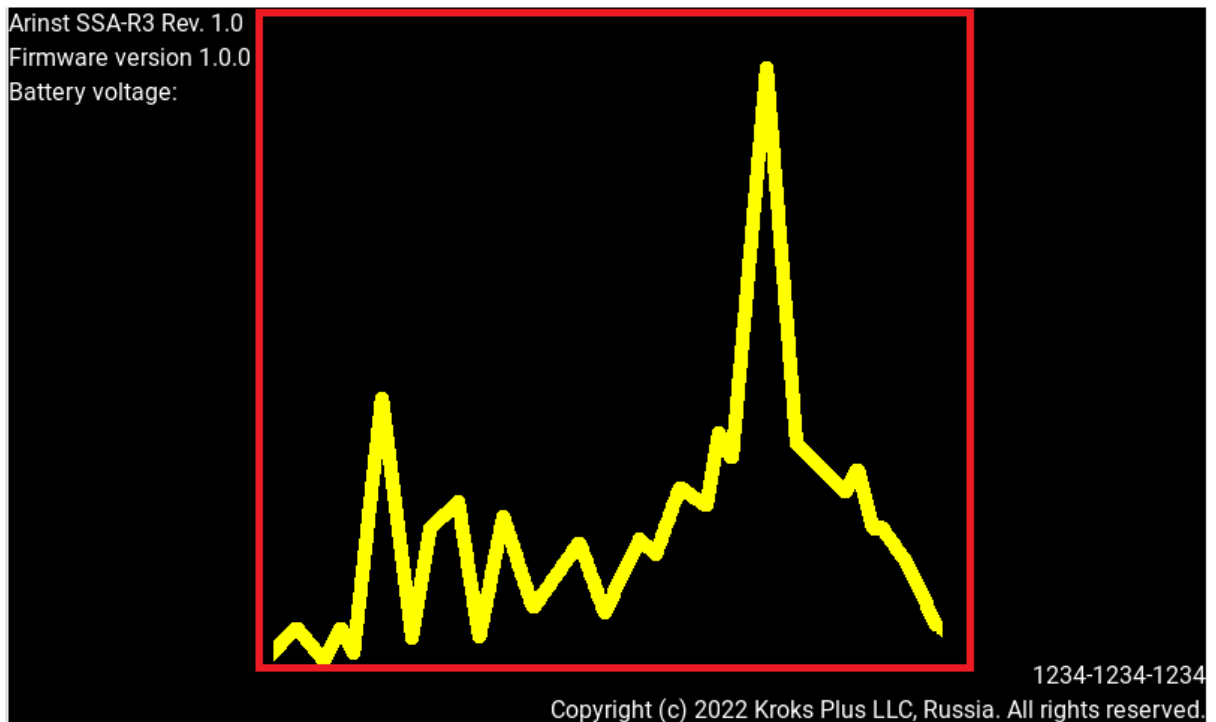

All of the above devices have an option to enter a maintenance menu in order to perform various functions related to device configuration:

- Full reset to factory configuration, including touch screen calibration.
- Touch screen calibration (use at your own risk).
- Reset of current device settings.
- Reset of all saved presets and/or frequency region data, where applicable.

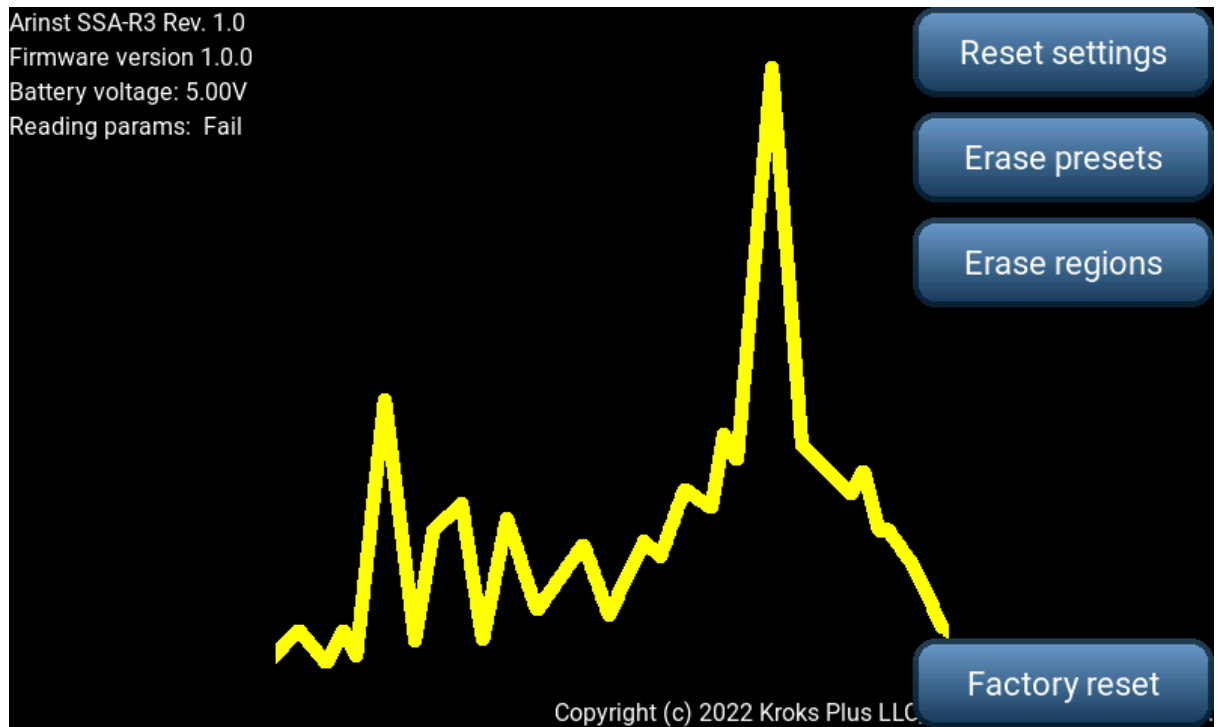

Use these functions at your own discretion.

Follow these steps in order to access the reset menu:

1. Shutdown the device.
2. Power on the device and press and hold down the Arinst logo during startup (area highlighted on the picture below):

3. If done correctly the reset menu should appear (menu of the SSA R3 pictured at the image below):

4. In order to exit the menu, tap the Arinst logo again.

Important notes:

- During reset menu state device falls back on default touch screen calibration.
- Every button in the reset menu is actuated via long press, including the confirmation buttons on pop-ups.
